EXPRESS CYCLE

EXPRESS FILLER

SAVE TIME
AND ELECTRICITY

Always careful to the profit improvement of its customers, IVAT introduces a special line of express products that allows to obtain a big energy saving. Find out the various combinations:

 +  **FK9.SP01 FP FILLER DRYER FOR GROUND FILLER:** The usage of this special activator allows to halve the drying times of the filler.

 +  **FK9.XF01 HH FILLER DRYER FOR SKY FILLER:** The usage of this special activator allows to halve drying times of the filler.

 **KKL.3500 AIR SPEED CLEAR:** 2K UHS Ultrafast Clearcoat, specific for spot repair and partial renovations both with water and solvent basecoat. It doesn't require to use the oven.

 **KKL.2700 PRORAPID CLEAR:** 2K UHS fast air drying clearcoat. Ideal for all repairs (touch up and complete coatings), with water and solvent basecoat. It can be used also with oven drying

 **KKL.2300 PROEXPRESS CLEAR:** 2K UHS fast air drying clearcoat. Ideal for all repairs (touch up and complete coatings), with water and solvent basecoat. It can be used also with oven drying

With the choice of air dry products you can totally eliminate the costs of oven use and you can also considerably reduce the lead time of your work.

The express line products are compatible with traditional IVAT products and they can be used in mixed cycles (express filler + traditional clearcoat or traditional filler + express clearcoat)

By way of illustration we report the differences between a traditional cycle and an express one, in conditions of standard temperature, both with air and oven dry

N.B. the mentioned data are an extract of the technical data sheets. For complete information always refer to technical data sheet.

SPEED & QUALITY IN YOUR HANDS
